

PROBLEM STATEMENT

- 1.** The user has to be aware about plasma donation so that they can donate the plasma (when, where, why).
- 2.** The user needs to know about the camp or drive locations so that they can donate in person.
- 3.** The user should find the application to be user friendly so that they can access the resources easily.
- 4.** The user needs to feel secure about their data so that they don't have to worry about their privacy and confidentiality.
- 5.** Patients should be able to directly contact the donor so that maximum donors can be reached.
- 6.** Both the donors and recipients need to be allowed to reject or accept the request so that they can be aware of further process.
